

Present Realities:

On January 12th, 2010 an earthquake devastated an already impoverished country. It is possibly one of the worst natural disasters in the world, wreaking havoc in one of the poorest countries. Life in Haiti will be effected by this for years to come; impacting everything from food to fuel and from to transportation to trade.

The immediate need for post-earthquake emergency medical care has been replaced by a need for public healthcare which teams have seen in the past. We have been working alongside our partners at Haiti ARISE Ministries (HAM), which has provided refuge for many in the aftermath of the earthquake. Providing a medical clinic only further demonstrates HAM's passion for the people in this community.

Plan of Action:

We plan to provide an opportunity to facilitate a group to visit our partner in Thozin, Grand Goave. Dr. Bob Cutler, who has previous medical experience in Haiti, assisted by a team of doctors and nurses, will work alongside the local leadership of HAM to provide medical care in the community. We expect to see 800+ patients at the clinic. The clinics run semi-annually within the community. This further strengthens our relationship between the Cranbrook Community Team (CCT) and HAM.

Projected Costs:

POTENTIAL ACTIVITY	FUNDS REQUIRED	PEOPLE AFFECTED
Supplies and medicines	~\$10,000	800+
Translators and Staff	~\$2,000	800+
Follow up surgeries	~\$1,000	4+
TOTAL:	~\$13,000	800+

Project Benefits:

We will demonstrate and communicate the love of God by providing medical care to people who have limited opportunity to attain medical attention. The team will empower the local church and community leadership as it works alongside Haiti ARISE Ministries in caring for the people of Grand Goave.

Persons Responsible for the Project:

The staff of Hungry for Life, under the leadership of the Board of Directors, are responsible for the project.
