

✓ Uganda, Mukono

Promontory Community Church Dairy Project

Promontory Community Church is working alongside Noah's Ark Children's Ministry Uganda (NACMU) to construct a building for housing cows and to purchase animals to begin dairy operation as part of community transformation. This is the first step in a long-term plan that the church has begun in order to see the community of Mukono, Uganda transformed as lives are changed.

✓ Results

- > Three cows were purchased.
- > 107 children at NACMU will now enjoy fresh milk.
- > The cows will be a part of an animal husbandry program for children at NACMU and the local community.
- > Cow manure will be used as fertilizer to increase food production within community.
- > A biogas plant will be built to utilize manure in order to provide fuel for cooking.

✓ Team Member Quotes

"The biggest take home message was that North Americans may have the advantage of technology, but we do not have the corner knowledge when it comes to agriculture and animal husbandry."

"The one thing that stands out the most to me is how education that we take from granted in North America can make such a difference in the lives of the children and community."

"Change for me has come in the assurance that the money that is given and spent by the partner is having a huge impact in reaching lives for Christ."
