

Guest House Update

Nov 2006

the guesthouse in the summer

future dining room

two bedrooms in the making

The renovations on the guest house are going well! The garage has been built along with a storage room. The roof has been completed - which involved raising it on one side to make it even... and in doing so, it created enough space for 2 more bedrooms!

All the walls have been mudded, the floors are almost complete and the ceilings have been started. The electricity is all in, and the heating system is going to be installed within a couple weeks.

When finished, the guesthouse will contain 6 bedrooms, a kitchen, a dining room, a living room and 2 and a half bathrooms (possibly 3 and a half).
